

## Location

Cinderford, Gloucester

## Nature of Business

Partington Engineering Limited is a leading manufacturer of materials handling equipment in the UK. Additionally, the operation and its processes are designed and established to manufacture a broad range of products from materials handling to engineered security systems and barriers.

The business is customer driven and to this end, product customisation to meet a customer's particular needs is welcomed and encouraged, from the supply of a single product to the planning and design of sophisticated solutions and the provision of a team of service and maintenance engineers to ensure optimal product design and operation.

## Products and Services

They are a major supplier of Cash and Carry trolleys to the top Cash and Carry groups throughout the United Kingdom and their Garden Centre trolleys are chosen by the fastest growing Garden Centre chain-stores throughout the country. They also manufacture industrial platform trolleys, a wide range of sack trucks, various panel trolleys, cylinder bottle trolleys and rack storage systems, drum handling equipment, and even bicycle racks.

In addition to the trolleys above, they supply a range of wheels and castors for both DIY and Industrial applications.

## Customer Base

Partington's customer base varies from international blue-chip companies to local garden supply stores. Partington also does jobbing from small to large scale jobs to several customers.
